Cloud-based Document Management

A secure, user-friendly document management and business process automation suite.

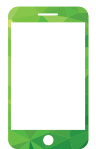

For an organization to be efficient and agile, managers and employees must be able to work with mission-critical data anywhere; at home or on the road, at their desk or on vacation. But, traditional filing systems – paper documents, shared drives, personal hard drives – are rife with hassles, headaches, risks and expense. eSAFE is a centralized repository where all documents are accessed and managed, eliminating the inefficiencies of filing cabinets, shared drives and local hard drives. eSAFE...

Cloud

Web

Mobile

- Streamlines overflowing paperwork through simple workflows, easy sharing of documents with non-eSAFE users, and automated document set creation.
- Provides an effortless implementation. The simple user interface is easy to learn and allows for fast user adoption, immediately increasing efficiencies for your business.
- Supports granular security features such as 128-bit encrypted file transfer,
- 256-bit encrypted data storage, automatic expirations for documents, and encrypted salted passwords for maximum protection.

Work the way you want with **eSAFE.**

One Company– Multiple Solutions
